NNCE Spotlight

The creation of the NCCCE Shared ILS group is the culmination of years of planning efforts of librarians throughout North Carolina. Conversations began in fall 2019 to explore options for a new ILS. The group contacted the North Carolina State Library Cardinal team for guidance.

During meetings with NC Cardinal, the group concluded an open-source ILS platform would be the most cost-effective option and would provide a modern system regularly enhanced and updated by a community of users. The open-source model would give libraries the desired autonomy to manage their individual instances of the platform.

The Evergreen ILS was chosen for several reasons. First, the successful implementation of Evergreen for a consortium is evidenced by the successes of Georgia PINES, NC Cardinal, Sage Library Systems, and Linn Libraries of Oregon. These four library systems host an extraordinary number of libraries in one shared instance. They can seamlessly integrate updates and revisions to their systems at low to no cost. Second, NC Cardinal provided invaluable guidance and assistance throughout the process. Third, utilizing the same ILS as NC Cardinal and partnering with MOBIUS expedited getting approval from NCDIT for our instance of Evergreen. Finally, migrating to this platform will provide future resource-sharing opportunities with public libraries.

Our planning committee received a 2021-2022 Library Services and Technology Act (LSTA) Grant through the State Library to develop a plan to migrate five libraries to Evergreen and create a scalable model for all 58 community college libraries. A

consultant was hired to facilitate user experience groups comprised of faculty, students, and library staff representing small, medium, and large-sized libraries to test the Evergreen ILS platform. The consultant assessed the structure and practices of the old consortium and made recommendations to develop a new shared ILS for community college libraries. The planning committee formally presented the project at the Community College Library Administrators conference in July 2021.

The planning grant resulted in the formation of a Governance Committee to oversee the North Carolina Community College Evergreen ILS Group (NCCCE); the creation of a Memorandum of Agreement and bylaws; a commitment from 25 community college libraries to migrate to Evergreen; and standing monthly update meetings to answer questions and provide information related to the project.

In July 2023, NCCCE received a multi-year LSTA Project Grant through the State Library for 25 community college libraries to migrate to Evergreen and contracted with MOBIUS for training, hosting, and support services. The NCCCE planning committee met weekly with MOBIUS for the migration. The committee met bi-weekly with NC Cardinal to better understand their processes and best practices.

The first cohort of libraries migrated to NCCCE in December 2023. There were very few issues due to the advanced planning and guidance from MOBIUS and the NC Cardinal team. The successful implementation allowed NCCCE to receive a second-year LSTA Project Grant to migrate additional libraries. The second migration occurred in December 2024, resulting in a shared ILS of 50 of the 58 community college libraries in North Carolina.

2024 Fun Facts

18 authors have 10+ commits, including new author Ian Skelskey (Bibliomation)

A total of 35 authors contributed 760 commits in 2024

Comparable to 2023 which had 744 total commits by 38 authors

New core committer **Stephanie Leary** (Equinox Open Library Initiative) appointed January 2024

78% of commits were code and 22% were docs.

Releases & Features

3.13 and 3.14

In 2024, the Evergreen community released 3.13 and 3.14. Major improvements included:

- Upgrades to the native self-checkout interface
- Multi factor authentication for staff accounts
- Angular ports of the Record Buckets, Reports, Invoices, Claims, Circ Policies, and Z39.50 interfaces
- New tools for administrators to manage SIP connections and SIP data
- Numerous accessibility improvements to the staff client and OPAC
- Rewrite of the MARC Editor interface

The following organizations sponsored development released in 2024:

- BC Libraries Cooperative
- Evergreen Community Development Initiative
- Evergreen Indiana
- King County Library System
- OWWL Library System
- Pennsylvania Integrated Library System
- Traverse des Sioux Library System

Evergreen 3.13

June 7, 2024

Release Team:

- Blake Graham-Henderson (MOBIUS)
- Bill Erickson (KCLS)
- Shula Link (PINES)
- Stephanie Leary (Equinox)
- Andrea Buntz Neiman (Equinox)

3.13.0 (including beta & release candidate) had 18 major features and 35 bugfixes.

45 individuals representing 19 organizations from 3 countries contributed to this release with code, translations, documentations, patches, and testing. Five organizations commissioned developments for this release.

Full release notes for 3.13 are here: https://evergreen-ils.org/documentation/release/RELEASE_NOTES_3_13.html

Evergreen 3.14

October 22, 2024

Release Team:

- Ruth Davis (Evergreen Community Development Initiative)
- Blake Graham Henderson (MOBIUS)
- Jason Stephenson (C/W MARS)
- Josh Stompro (LARL)
- Jessica Woolford (Bibliomation)

3.14.0 (including beta & release candidate) had 22 major features and 58 bugfixes.

43 individuals representing 17 organizations across 3 countries contributed to this release with code, translations, documentations, patches, and testing. Five organizations commissioned developments for this release.

A special thank you goes to employees of the National Network for Equitable Library Service (Canada) whose employees performed accessibility testing for this release of Evergreen.

Full release notes for 3.14 are here: https://evergreen-ils.org/documentation/release/RELEASE_NOTES_3_14.html

Welcome and Keynote
with Richard Littauer
(organizer of *SustainOSS* and
host of the *Sustain Podcast*)

International Conference

Every year the Evergreen International Conference brings the community together. This year we had 112 attendees for the pre-conference, 285 for the main conference and 127 for the Hackfest and 11 sponsors. Our Keynote speaker Richard Littauer is the organizer of SustainOSS and host of the Sustain Podcast. His speech on sustainability in open source projects continue a discussion we have had in recent years in making sure we are a strong diverse community that contributes to the long term health of the project. For the first time we also had an invited speaker, Terry Reese, creator of Marc Edit.

Some of our presentations highlight the diversity of the conference experience. Introductory presentations included acquisitions, permissions, using parts with serials, buckets and for those interested in documentation and code using git. King County presented on Redis and Beyond looking at the low level code supporting Evergreen while more developer presentations looked at UI accessibility. For managing Evergreeners we talked about building a culture of open source contribution, the patron experience with discovery layers and concerns specific to consortia.

This year the conference was online and a full playlist of the presentations can be found here:

<https://www.youtube.com/watch?v=zZXKJfLaLUU&list=PLsktT5b82paVQ5JMp-JG8hEuqxbX5wsnL2>

Hack-A-Way

Evergreen developers and community members gathered for the annual Hack-A-Way retreat in mid-November. The Hack-A-Way provides an opportunity for Evergreen stakeholders to collaborate on software improvements and do long term planning.

This year's Hack-A-Way was held at Endicott College in Beverly, MA and was hosted by North of Boston Library Exchange (NOBLE) and CW MARS. Twenty-five community members representing 12 organizations attended in person, with several others from across North America and Europe attending remotely.

Discussions at the Hack-A-Way included upcoming infrastructure upgrades to Evergreen, better handling of translations for monthly releases, project tooling and technical needs, website updates, and plans for the major Evergreen 4.0 release which will be forthcoming in 2025.

Community members also gave updates on longer running projects: independent developer Ken Cox discussed his Hemlock Evergreen app; developer Scott Angel of MOBIUS demonstrated his work on a staff dashboard; and developer Stephanie Leary of Equinox Open Library Initiative reported about the extensive progress she has made with accessibility improvements to Evergreen.

The Evergreen community extends our thanks to NOBLE and CW MARS for being excellent local hosts, and appreciation to Endicott College for the working space.

Strategic Plan

In very early 2025, the Evergreen Project Board approved its first strategic plan as a 501(c)3 organization. The strategic plan is the final product of a collaborative effort by stakeholders in the Evergreen open-source library software community. In 2024, the Strategic Plan Subcommittee worked with Carson Block Consulting to interpret previous focus group, survey, and community activity results and to host additional focus group interviews. The work culminated in a two-day virtual stakeholder retreat facilitated by Mr. Block and resulting in the framework for the plan.

The new strategic plan outlines a vision for the continued transformation of The Evergreen Project, over the next three to five years, into a self-sustaining non-profit organization. This organization will provide future-focused and reliable support for the Evergreen Community as well as advocacy for the open-source Evergreen ILS. That transformation has already begun.

The overall goals of the strategic plan were to define a project vision and priorities; support developers and community engagement; develop financial sustainability, and provide leadership in the Evergreen Community. To meet these goals, the Evergreen Project Board and community volunteers focused on key steps needed for continued transformation. Those steps include an organizational structure review and the development of a resource model.

A key step toward transformation was a review of the existing structure of The Evergreen Project and its place within and in support of the Evergreen Community. The organizational structure review analyzed the current state of The Evergreen Project and identified needed additions and changes. The strategic plan includes recommendations for identified additions and changes. Some of those recommendations include an update of the Project's bylaws, a review of board and committee composition, and the possibility for permanent staff.

The next step is, perhaps, the most transformative—the development and implementation of a resource model to bolster the work of The Evergreen Project. The proposed resource model is a multi-faceted approach with each component complementing the other. It involves the adoption of a membership model that includes a contributor program as well as a staffing and contributor structure. The membership model will create a value-added program incentivizing organizations and individuals to join The Evergreen Project in order to generate resources to fund the goals identified in the plan. It also includes a fee-free path to membership for individuals who contribute to the Evergreen Community. The staffing and contributor structure outlines The Evergreen Project's needs to compensate individuals and/or organizations for services.

The Evergreen Project Board and the Strategic Plan Subcommittee are very grateful to the many people who provided feedback over the course of this project and are pleased to present this plan for the future to the Evergreen Community.
